

## Checklist

# Botox Treatment of Hyperhidrosis

Dear Patient,

You have decided to have Botox treatment of hyperhidrosis (excessive sweating).

The treatment costs EUR 600,- for both sides.

Please note the following details.

Should you have any questions, please do not hesitate to contact me at any time.

Univ.Doz.Dr. Greta Nehrer

### **BEFORE THE PROCEDURE**

---

- The Botox treatment takes only about 10 minutes to perform.
- You will experience only a mild burning sensation during the treatment. If desired, the area to be treated may be prepared with a local anaesthetic ointment before the treatment.

### **AFTER THE PROCEDURE**

---

- Mild redness in the area around the injection site usually remains visible for just a few minutes.
- You may shower or use deodorants immediately after the treatment.
- Avoid sauna visits and sports for a period of 12 hours.
- The results of the treatment can usually be seen within 3-5 days after the procedure.
- If you are not satisfied with the results after 2 weeks, please contact us for a check-up and possible repeat treatment.
- The effects of Botox usually last for 4- 12 months (most often 6 months). We recommend returning for repeat treatment.
